

CHRISTOPHER KEYES

christopher.keyes@kcl.ac.uk
<https://c-keyes.github.io/>

King's College London
Department of Mathematics
S5.42, Strand Building
London, WC2R 2LS, United Kingdom

RESEARCH INTERESTS

Broad: number theory, arithmetic statistics, arithmetic geometry
Specific: rational points in families, local-global principles, higher degree points, counting field extensions

APPOINTMENTS

King's College London

2023 – 2026 Heilbronn Research Fellow, Department of Mathematics

EDUCATION

Emory University

2023 Ph.D., Mathematics
Thesis title: *Topics in arithmetic statistics*
Advisor: David Zureick-Brown

2021 M.S., Mathematics

Tufts University

2018 B.S., Mathematics and Chemical Engineering, *Summa Cum Laude*
Senior honors thesis: *Growth of points on hyperelliptic curves*, Highest Honors.

PUBLICATIONS AND PREPRINTS

9. On p -adic solubility of $Ax^\ell + By^m + Cz^n = 0$ (joint with A. Kobin, with an appendix by S. Arango-Piñeros). In preparation.
8. The integral Hasse principle for stacky curves associated to a family of generalized Fermat equations (joint with J. Duque-Rosero, A. Kobin, M. Roy, S. Sankar, Y. Wang). Submitted. ([preprint](#))
7. Effective Bertini theorems and zeros of p -adic forms of degrees 7 and 11 (joint with L. Beneish). Submitted. ([preprint](#))
6. How often does a cubic hypersurface in \mathbb{P}^n have a rational point? (joint with L. Beneish). *Selecta Mathematica*, Volume 31, Article Number 92, 2025. ([journal](#), [preprint](#))
5. Fields generated by points on superelliptic curves (joint with L. Beneish). *Journal of Number Theory*, Volume 278, 2026, pp. 380-421. ([journal](#), [preprint](#))
4. On the density of locally soluble superelliptic curves (joint with L. Beneish). *Finite Fields and Their Applications*, Volume 85, Article 102128, 2023. ([journal](#), [preprint](#))
3. Mertens' theorem for Chebotarev sets (joint with S. Arango-Piñeros and D. Keliher). *International Journal of Number Theory*, Volume 18, Issue 8, 2022, pp. 1823-1842. ([journal](#), [preprint](#))
2. Growth of points on hyperelliptic curves. *Journal de Théorie des Nombres de Bordeaux*, Volume 34, Issue 1, 2022, pp. 271-294. ([journal](#), [preprint](#))
1. Bounding the number of arithmetical structures on graphs (joint with T. Reiter). *Discrete Mathematics*, Volume 344, Issue 9, 2021. ([journal](#), [preprint](#))

GRANTS AND AWARDS

- 2026 Oberwolfach Research Fellows, Existence and enumeration of integral points on spherical stacky curves, October 18 – 30, 2026
- 2024 – 26 AMS-Simons Travel Grant (5000 USD)
- 2025 BIRS Focused Research Groups workshop, [Existence and enumeration of integral points on spherical stacky curves](#), October 26 – November 2, 2025
- 2025 ICMS Research in Groups, Existence and enumeration of integral points on spherical stacky curves, June 23 – July 4, 2025
- 2025 CIRM Research in Residence, for collaboration with Lea Beneish on [explicit local solubility and applications](#), June 9 – 20, 2025
- 2024 BIRS Research in Teams workshop, for collaboration with Lea Beneish on [explicit local solubility and applications](#), December 8 – 15, 2024
- 2024 ICMS Research in Groups, for collaboration with Lea Beneish on explicit local solubility and applications, June 1 – 14, 2024
- 2023 Graduate Student Research Award, Emory University Math Department
- 2023 Marshall Hall Award for Outstanding Teaching, Emory University Math Department

TEACHING EXPERIENCE

London Taught Course Consortium

Spring 2025 Instructor, Arithmetic Statistics (advanced graduate course)

Emory University

- 2020 – 2021 Instructor, Math 111 (Calculus I), 2 sections, 68 students total
- 2019 – 2020 Teaching Assistant, Math 221 (Linear Algebra), 4 sections, 104 students total
- 2018 – 2019 Grader, Math 250 (Foundations of Mathematics), 3 sections
- Spring 2019 Grader, Math 212 (Differential Equations)
- Fall 2018 Grader, Math 328 (Number Theory)
- 2018 – 2019 Tutor, weekly calculus workshops

INVITED TALKS

25. *Towards Artin's conjecture on p -adic forms in low degree.* The Wassail of Rational Points, University of Bath, January 26, 2026.
24. *Towards Artin's conjecture on p -adic forms in low degree.* AMS Special Session on Algebraic and Analytic Aspects of Curves and L-functions, Joint Math Meetings, January 4, 2026.
23. *Towards Artin's conjecture on p -adic forms in low degree.* Number Theory, Algebra and Geometry Seminar, University of Exeter, November 19, 2025.
22. *The Hasse principle for families of generalized Fermat equations.* Algebra and Number Theory Seminar, Dartmouth College, November 3, 2025.
21. *Towards Artin's conjecture on p -adic forms in low degree.* Algebra, Number Theory, Logic, and Representations Seminar, University of East Anglia, October 14, 2025.

20. *The Hasse principle for generalized Fermat equations of the form $x^2 + By^2 = Cz^n$.* Spring of Rational Points II, University of Bath, May 13, 2025.
19. *Towards Artin's conjecture on p -adic quintic forms.* Great Western Number Theory Seminar, University of Reading, April 4, 2025.
18. *Towards Artin's conjecture on p -adic quintic forms.* Manchester Number Theory Seminar, University of Manchester, March 18, 2025.
17. *Towards Artin's conjecture on p -adic quintic forms.* London Number Theory Seminar, University College London, March 5, 2025.
16. *How often does a cubic hypersurface have a rational point?* Number Theory Seminar, University of Illinois Chicago, October 15, 2024.
15. *How often does a cubic hypersurface have a rational point?* Arithmetic Geometry Seminar, University of Bath, May 21, 2024.
14. *How often does a cubic hypersurface have a rational point?* Utrecht Geometry Centre Seminar, Utrecht University, April 9, 2024.
13. *How often does a cubic hypersurface have a rational point?* Number Theory Seminar, University of Cambridge, February 20, 2024.
12. *Explicit local solubility in families of varieties.* KCL Internal Number Theory Seminar, King's College London, November 30, 2023.
11. *Explicit local solubility in families of varieties.* Linfoot Seminar, University of Bristol, November 29, 2023.
10. *Local solubility in families of superelliptic curves.* UNT Algebra Seminar, University of North Texas, September 15, 2023.
9. *Local solubility in families of superelliptic curves.* UCI Number Theory Seminar, UC Irvine, January 19, 2023.
8. *Local solubility in families of superelliptic curves.* AMS Special Session on Arithmetic Statistics, Joint Math Meetings, January 6, 2023.
7. *Local solubility in families of superelliptic curves.* Number Theory Seminar, UC San Diego, November 21, 2022.
6. *Local solubility in families of superelliptic curves.* Number Theory Seminar, The Ohio State University, November 21, 2022.
5. *Local solubility in families of superelliptic curves.* Number Theory Seminar, University of Georgia, November 2, 2022.
4. *Local solubility in families of superelliptic curves.* Arithmetic Geometry and Number Theory Seminar, UC Berkeley, October 24, 2022.
3. *Local solubility in families of superelliptic curves.* Algebra, Geometry, and Number Theory Seminar, University of South Carolina, April 8, 2022.
2. *On the proportion of everywhere locally soluble superelliptic curves.* Secret AGeNTS, Tufts University (held virtually), November 18, 2021.
1. *Fields generated by points on superelliptic curves* (joint talk with Lea Beneish). UW Number Theory Seminar, University of Washington (held virtually), June 8, 2021.

CONTRIBUTED TALKS

8. *Local solubility in families of superelliptic curves.* Connecticut Number Theory Conference (CTNT), University of Connecticut, June 10, 2022.

7. *On the proportion of everywhere locally soluble superelliptic curves*. Upstate Number Theory Conference, Union College, October 23, 2021.
6. *Fields generated by points on superelliptic curves*. Young Researchers in Algebraic Number Theory (Y-RANT), University of Bristol (held virtually), August 19, 2021.
5. *Mertens' product theorem for primes in Chebotarev sets*. Front Range Number Theory Day, held virtually, April 24, 2021.
4. *An upper bound for the number of arithmetical structures on a graph*. Mid-Atlantic Seminar on Numbers (MASON) V, held virtually, March 27, 2021.
3. *An upper bound for the number of arithmetical structures on a graph*. Palmetto Joint Arithmetic, Modularity, and Analysis Series (PAJAMAS), University of South Carolina, December 6, 2020.
2. *Growth of points on hyperelliptic curves*. Tufts Undergraduate Research Symposium, Tufts University, May 3, 2018.
1. *Growth of points on hyperelliptic curves*. Palmetto Number Theory Series (PANTS) XXVIII, University of Tennessee Knoxville, September 17, 2017.

ORGANIZATION

Seminars

Summer 2025	Co-organizer of <i>London Number Theory Seminar</i> , with Igor Wigman (seminar website)
Spring 2024	Co-organizer of <i>KCL Postdoc Colloquium</i> , a series of talks given by and for the postdoctoral researchers at King's College London, with Jeremy Mann (seminar website)
Spring 2024	Co-organizer of <i>Show and Tell</i> , a series of talks by HIMR-London fellows, with Alex Best
2020 – 2023	Co-organizer of <i>RANT</i> , Emory's weekly graduate student seminar in algebra and number theory, with Alexis Newton (seminar website)
Spring 2023	Co-organizer of <i>Geometric Arithmetic Statistics at Emory Seminar (GASES)</i> , with Santiago Arango Piñeros and David Zureick-Brown (seminar website)
Fall 2023	Co-organizer of <i>Emory Arithmetic Statistics Student Seminar (EARSSS)</i> , with Santiago Arango Piñeros and David Zureick-Brown (seminar website)

Emory Math Directed Reading Program

Created and organized a directed reading program matching undergraduates with graduate students to read and discuss a mathematical text, serving 46 students total (Spring 2021 – Spring 2023). See [this webpage](#).

Total of 9 students mentored in multiple topics:

Spring 2023	<i>Clutch hitting</i> , Aileen He
Spring 2022	<i>Sports analytics</i> , Ezra Arovas
Fall 2021	<i>Elliptic curves</i> , 3 students
Spring 2021	<i>p-adic numbers</i> , 4 students

OUTREACH

Julia Robinson Math Festival

Co-organized (with Riti Bahl) math exploration event at Emory University on August 27, 2022, attended by about 150 middle and high school students and their families. Responsibilities included selecting and preparing activities, recruiting 15 volunteers, and leading volunteer training on the day of the festival.

Math Circle

Worked as an instructor with [Emory Math Circle](#) to plan and lead math exploration activities for middle and high school students in the Atlanta community.

- 2022 – 2023 Instructor, Emory Math Circle, High School Level B, 2 semesters, 52 students total
- 2021 – 2022 Instructor, Emory Math Circle, High School Level A, 2 semesters, 30 students total
- 2019 – 2020 Instructor, Emory Math Circle, Middle School Level C, 3 semesters, 91 students total
- Summer 2019 Assistant, Emory Math Circle Week of Mathematical Exploration
- Fall 2018 Instructor, Emory Math Circle, Middle School Level A, 25 students

EXPOSITORY WRITING

MAA Math Values Blog

- Reflections on applying for jobs as a PhD student, Part II, October 2024 ([link](#))
- Reflections on applying for jobs as a PhD student, Part I, October 2024 ([link](#))
- On directed reading, curiosity, and baseball, April 2022 ([link](#))

AMS Graduate Student Blog

- You should have a website (and it doesn't have to be hard), December 2021 ([link](#))
- Reflections on a return to in-person conferences, November 2021 ([link](#))
- Formatting your CV in LaTeX, October 2021 ([link](#))
